BOXFORD NURSERY: BOXFORD, MASS.

HIGHLANDS NURSERY: PINEOLA, NORTH CAROLINA  
3,800 feet elevation

# Information to Buyers

**BOXFORD NURSERY** (East Boxford P. O.) is located 28 miles north of Boston, at Boxford Station, on the Georgetown Branch, B. & M. R. R. Good automobile roads lead in all directions. Distances from Nursery to Boston, 28 miles; Salem, 14 miles; Lawrence, 11 miles; Haverhill, 9 miles; Newburyport, 10 miles; Manchester, 13 miles; Ipswich, 9 miles; Lowell, 20 miles.

Visitors are always welcome, and customers will find pleasure and a distinct advantage in personally inspecting material. Mr. Kelsey will be glad to meet prospective customers at the Nursery by appointment. A visit during Rhododendron, Kalmia, and Azalea blooming season is an event really worth while.

**HIGHLANDS NURSERY**, Pineola, western North Carolina, is located at 3,800 feet elevation, on the crest of the Blue Ridge Mountains. Here many of our choicest new American plants have been grown and introduced for the first time to cultivation, including **Carolina Hemlock**, **Azalea vaseyi**, **Rhododendron carolinianum**, **Lilium grayi**, **Shortia galacifolia**, **Robinia kelseyi**, and many others. From here also we ship "collected" Rhododendrons and Kalmias in carload lots, of a grade far superior to Pennsylvania "collected" material. "Collected" Rhododendron catawbiense (true) comes only from our high southern mountains.

**AMERICAN NATIVE PLANTS.** Specialties at both Nurseries are Hardy American Plants, which must always be the basis of all successful permanent plantings, and **Specimen Evergreens.** We have thousands of the choicest conifers up to 20 feet in height, Rhododendrons 4 to 5 feet in diameter; Azaleas in splendid clumps, heavily budded; and Dwarf Evergreens for immediate effect in Rockwork and Borders. We are the first and still the largest growers of American Native Ornamentals.

**EMBARGO ON FOREIGN STOCK.** The Federal Horticultural Board has proclaimed a complete embargo on all Foreign Trees and Shrubs and practically all Herbaceous Plants. This means a distinct horticultural advance in America, for Americans must now learn that our Native Trees and Plants are hardier, freer from disease, more permanent, and far more beautiful and "fitting" in our landscapes and home grounds than exotic material. The best exotics can and now will be grown in America for Americans. **We are growing them by thousands.**

**SHIPPING SEASON** begins in August for Rhododendrons, Kalmias, Conifers and many herbaceous plants, general stock going out from September to December. Spring shipments usually from March to June.

**SHIPPING INSTRUCTIONS** should be given, otherwise I use my best judgment, but assume no risk. All shipments travel at consignee's risk and carriers must be held liable for damage in transit. *All stock becomes the property of the purchaser on delivery to transportation company or carrier.*

**DELIVERY BY TRUCK.** Where the size of order warrants, there are distinct advantages in auto truck delivery for distances up to 30 to 50 miles and we have made large deliveries up to 200 miles. Stock arrives quickly and when wanted is delivered fresh on the grounds and saves local trucking and unpacking. Charges are made according to size of truck and distance traveled.

**PRICES** are made to fit the quality of stock sent out. Discriminating buyers now realize that the greatest value of nursery stock is *underground*. Frequent transplanting, and handling specimens with adequate, burlaped balls, mean success and quick results. It costs more, but it is the fixed policy of the Boxford Nursery, and "cheap" stock will not be handled or sent out. The best is always the cheapest.

**SPECIAL SELECTION.** Stock selected by customers at Nursery or specially selected stock ordered by mail or otherwise will be charged at advanced prices to fit the value of stock selected. The prices in this catalogue cover the average good grade as they run in the nursery row.

**PACKING CHARGES.** At prices printed in this catalogue, Boxing, Baling, or Burlaping is free, except where noted. Where small sizes or deciduous stock is balled and burlaped by special request, a charge is always made to cover cost. See page 23 for Burlaping charges.

**TERMS.** Cash or satisfactory reference from unknown customers. All accounts are due the first of each month, unless by special arrangement. 5 at 10 rate; 50 at 100 rate; 500 at 1,000 rate.

**NON-WARRANTY.** No guarantee, express or implied, is made that stock will grow, whether planted by me or otherwise. Having no control over after treatment of plantings or over weather conditions, it is obvious that purchaser must assume all responsibility after stock leaves the Nursery in good condition. However, under certain conditions, I am prepared to guarantee plantings made by me covering a specified period, on an insurance basis. Charges will be made according to risk involved and value of material.

Claims for errors must be made on receipt of goods. If there is any mistake or fault on my part it will gladly be rectified.

**PLANT NAMES.** The botanical scientific names of **Trees, Shrubs, and Woody Vines** in this catalogue conform to the 1917 **Official Code of Standardized Plant Names**, adopted and published by **The American Joint Committee on Horticultural Nomenclature**, as first printed in L. H. Bailey's "Standard Cyclopedia of American Horticulture," Vol. VI, 1917.

**LANDSCAPE FORESTRY.** Evergreen seedlings and transplants in large quantities are grown at both nurseries in the choicest species. We do Landscape Forestry, treating woodlands from a **landscape standpoint** as well as for commercial uses. Mr. Kelsey is open for consultations and engagements. Always address,

# Kelsey's Hardy Specimen Evergreens

## CATALOG OF BOXFORD NURSERY

### Prices at Boxford Nursery

NOTE.—All stock transplanted and nursery-grown unless marked otherwise. "S"—Seedlings. "Col."—Collected.

The larger sizes of Evergreens are always shipped with balls, and burlaped.

The prices in this list cover the average good grade as they run in the nursery row. Where specimens are picked, a price will be made to fit the specimen.

### Evergreen Trees and Shrubs

4 to 5 ft. . . . .	6 00		
communis depressa. PROSTRATE JUNIPER. The best prostrate form of Juniper for ground-cover. It is at home on sandy or gravelly hill- sides, fully exposed to the sun, where single plants often reach a diameter of 15 feet or more. In shade it does well where other shrubs or grass will not thrive, forming a looser covering, however, than in the opening. It varies in form from the completely prostrate type to the ascending type, 2 to 4 feet high.

<b>virginiana.</b> RED CEDAR. 15 to 60 ft. Pyramidal habit; dark green to bluish foliage, with many variable forms. This is one of the most useful and characteristic trees of our native landscapes. It rivals the Italian Cypress in beauty, is absolutely hardy, and stands sea exposure well. Fruit dark blue and conspicuous, hanging until mid-winter. For many effects it is the most useful evergreen for northern latitudes. This is a specialty at Boxford Nursery, and we can supply trees up to 30 feet. We have made many notable plantings of large Cedars with uniform success.

<b>Leucothoe catesbaei.</b> LEUCOTHOE. 3 to 8 ft. Few shrub evergreens of the broad-leaved sort have the grace of this one. The thick, shining green leaves are evenly disposed on long, recurved branches, with dense racemes of beautiful, white, bell-shaped flowers. As an under-shrub or for banks and the borders of streams it is without a rival. As an edging and "finish" for the "Rhododendron bed" it is indispensable, and should be used freely for best effect. The sprays make beautiful winter decorations indoors, turning a rich bronze in the fall where exposed to the sun. My stock of this broad-leaved border plant comprises thousands of specimens in all sizes up to 2½ feet in diameter.

**Rhododendron carolinianum.** A new American species. Clear pink. Absolutely hardy. This is one of our finest introductions and fills a long-felt want for a hardy dwarf Rhododendron with flowers free from any hint of magenta. It was described and named by Alfred Rehder, of the Arnold Arboretum. It is the smallest Alleghanian species, attaining a height of 6 to 8 feet in cultivation. The thick-set leaves are dark green, usually blunt and narrow, covered with rusty dots below, much smaller than either maximum or catawbiense. Flower-clusters appear in greatest profusion in June, covering the plant with a rose-colored mantle. Fine for rocky slopes or hillsides, standing exposure unusually well and invaluable as a single specimen or for massing.

**catawbiense.** Of the Carolina mountains. The hardiest of all Rhododendrons. It was this magnificent Rhododendron that over a hundred years ago was introduced into Europe, supplying, together with *Rhododendron maximum*, color and hardy blood to the cultivated "hybrids," but with a consequent loss of hardiness; and so today, for American gardens, where ironclad hardiness is essential, we must turn to the true original species, found on the loftiest, coldest peaks of the southern Alleghanies, where it attains a height of 20 to

## EVERGREEN TREES AND SHRUBS, continued

### Rhododendron catawbiense, continued

30 feet. Considering the extreme hardiness, color of flower, compact growth, and remarkable texture of foliage, which is a deep, shining green, and far superior to the better-known *Rhododendron maximum*, we can recommend the true native *catawbiense* as the finest for general use, withstanding exposure and extremes of temperature where other *Rhododendrons* fail. Unlike *Rhododendron maximum*, it is a very free bloomer, with foliage of a dark, rich, lasting green which never rusts. The trusses are a bright red-purple (in marked contrast to the muddy purple of the semi-hardy, half-breed imported variety), and as sent out by Highlands Nursery is always on its own roots. For massing to produce a broad-leaved evergreen landscape effect, there is no plant equal to it in the latitude of the northern United States and Canada, where strictly hardy plants must be employed.

everestianum	roseum elegans
F. D. Godman	roseum luteum

### catawbiense var. compacta. New Introduction.

A very compact growing form from the highest peaks of the Southern Alleghany Mountains, with dark green foliage, entirely distinct from the *catawbiense* type in usual cultivation. We offer this for the first time in perfect specimens as follows:

## Hardy American Azaleas

**Azalea arborescens.** FRAGRANT WHITE AZALEA. 5 to 15 ft. In June the delightfully spicy fragrant white flowers, with pink stamens, appear in profusion, lasting for weeks. Becomes a spreading clump 3 to 6 feet broad in cultivation; easy culture. The foliage of this variety often colors striking shades of red in late autumn, and is the best of all the genus. The clumps offered have from twenty-five to one hundred stems and are heavily budded with enormous balls.

# KELSEY'S Hardy American Plants Rhododendrons and Azaleas

## DECIDUOUS TREES AND SHRUBS, continued

**Azalea lutea (calendulacea).** GREAT FLAME AZALEA. 6 to 15 ft. The most regal of all the species, native or exotic, and a noble representative of our rich Carolina mountain flora. Bartram, speaking of it in his "Travels," calls it the "fiery Azalea," and says: "This epithet 'fiery' I annex to this most celebrated species of Azalea as being expressive of the appearance of its flowers, which are in general of the color of the finest red lead, orange, and bright gold as well as yellow and cream-color. This is certainly the most gay and brilliant-flowering shrub yet known." No more striking landscape effect can be produced than a hillside of *Azalea lutea* in full bloom. Nearly all quoted above 18 inches are budded. These *Azalea lutea* are splendid clumps, with a mass of buds, and range in color from light sulphur-yellow to deep red.

3 to 4 ft., clumps..... 4 00 36 00

**vaseyi.** SOUTHERN AZALEA. 6 to 15 ft. This showy Azalea was discovered only at late as 1878, and introduced by Highlands Nursery very soon after. It is of easy culture, and is perhaps the most profuse bloomer of all the native species, and the more conspicuous, as its white, pink, or deep rose-colored flowers appear in early April or May before the foliage. Of erect, slender habit, naturally, in cultivation, it becomes more spreading, while retaining the charming light stem-growth. Autumn usually turns the leaves a deep dark crimson, greatly enhancing its beauty and value.

**SALIX.** Our collection of Willows covers almost all the species that are planted in the Arnold Arboretum, and we have others in smaller quantities that have lately been discovered in China and elsewhere. Many of the Willows are charming dwarf and semi prostrate shrubs notably beautiful, with bright yellow, brown, and green branchlets, or sometimes covered with a white bloom. The catkins are extremely showy and range from tiny balls of down to golden yellow spikes. Most of them thrive well in both dry soils and in very moist locations.

	Each	10	100
<i>acutifolia</i> . 15 to 25 ft. Branchlets dark colored, covered with bloom; long, narrow leaves.			
3 to 4 ft.....	\$ 40	\$3 20

<b>ludificans.</b> Shrubby, smooth leaves, glaucous beneath. 2 to 3 ft.....	40	3 20	
<b>myrsinifolia.</b> Shrubs up to 12 feet. Broad, acute leaves, glabrous above and wooly underneath.			
2 to 3 ft.....	40	3 20	
4 to 5 ft.....	60	5 00	
5 to 6 ft.....	80	7 20	
<b>myrtilloides, female.</b> 2 to 3 ft. Shrub or tree; very showy foliage. 3 to 4 ft.....	60	5 00	40 00
4 to 5 ft.....	80		
<b>nerifolia (purpurea X grandiflora).</b> 3 to 6 feet. Shrub; young branchlets pubescent, later smooth green or brown. 2 to 3 ft.....	60	5 00	
<b>pentandra.</b> LAUREL LEAVED WILLOW. 40 to 60 feet. Shiny foliage; rapid grower. 1 to 2 ft..	30	2 40	20 00
2 to 3 ft.....	40	3 20	
4 to 6 ft.....	60	5 00	40 00
6 to 8 ft.....	1 00	8 00	
<b>petiolaris.</b> Shrub to 10 feet, with narrow leaves.			
3 to 4 ft.....	60	5 00	
4 to 5 ft.....	80	7 20	
<b>phylicifolia.</b> 3 to 5 feet. Branchlets smooth; polished, glossy foliage. 12 to 18 in.....	40	3 20	24 00
3 to 4 ft.....	60	5 00	
<b>phylicifolia crowiana.</b> Shrub to 5 feet, with stout branches and rather broad leaves, whitish below. 1 to 2 ft.....	40	3 20	
<b>piperi.</b> Shrub to 20 feet; dark brown branchlets; large leaves. 3 to 4 ft.....	40	3 20	
<b>purpurea.</b> Shrub or small tree to 15 feet, with slender purple branches, and rather small, narrow leaves. Much used for fine basket work abroad. 3 to 4 ft.....	40	3 20	
4 to 5 ft.....	60	5 00	
<b>purpurea amplexicaulis.</b> Small tree. Similar to <i>S. purpurea</i> , but leaves broader. 1 to 2 ft.	60	5 00	
<b>purpurea kecksi.</b> Little different from <i>S. purpurea</i> , 4 to 5 ft.....	40	3 20	
6 to 7 ft.....	80	7 20	
<b>purpurea lambertiana.</b> PURPLE OSIER. Shrub or small tree with slender purple branches.			
2 to 3 ft.....	40	3 20	24 00
3 to 4 ft.....	60	5 00	
4 to 5 ft.....	80	7 20	60 00
5 to 6 ft.....	1 00	8 00	
<b>purpurea sericea.</b> Small tree. Similar to <i>S. purpurea</i> but leaves silky. 3 to 4 ft.....	40	3 20	
4 to 5 ft.....	60	5 00	
<b>repens, female.</b> Fine dwarf procumbent species.			
2 to 3 ft.....	60	5 00	
3 to 4 ft.....	80	7 60	
<b>repens argentea.</b> Dwarf shrub with small silvery white leaves. 12 to 18 in.....	60	5 00	
<b>reuteri (daphnoides X elaeagnus).</b> Tall shrub; older branchlets brown and often covered with bloom; narrow dark green leaves.			
3 to 4 ft.....	60	5 00	
<b>rubens.</b> Tree with fragile branches; a hybrid between <i>S. alba</i> and <i>S. fragilis</i> . 2 to 3 ft.....	30	2 40	
4 to 5 ft.....	60	5 00	40 00
5 to 6 ft.....	80	7 60	
<b>rubens palustris.</b> Tree with fragile branchlets.			
2 to 3 ft.....	40	3 20	
4 to 5 ft.....	60	5 00	
<b>rubra.</b> Small shrub. 2 to 3 ft.....	40	3 20	
<b>Russian Golden.</b> Medium tree. 9 to 12 in....	25	2 00	18 00
2 to 3 ft.....	30	2 40	20 00
3 to 4 ft.....	40	3 20	24 00
<b>sericea.</b> One of the best dwarf species. 1 to 2 ft.	40	3 20	24 00
2 to 3 ft.....	60	5 00	
3 to 4 ft.....	80	7 20	
<b>sesquitertia.</b> Low shrub. 2 to 3 ft.....	60	5 00	
<b>sieboldiana.</b> Upright shrub; young branchlets tomentose, older glabrous; fine dark green foliage, white underneath. 1 to 2 ft.....	30	2 40	
2 to 3 ft.....	40	3 20	
3 to 4 ft.....	60	5 00	
<b>sordida.</b> Tall shrub, with long, dull green leaves.			
3 to 4 ft.....	60	5 00	
<b>sp. JAPAN.</b> 4 to 5 ft.....	60	5 00	
<b>stipularis.</b> Small tree to 15 feet, with tomentose branches and long leaves, densely downy below. 2 to 3 ft.....	40	3 20	
3 to 4 ft.....	60	5 00	
<b>tetrapla.</b> Shrubby, shiny leaves, a cross between <i>S. myrsinifolia</i> and <i>S. phylicifolia</i> . 1 to 2 ft.	40	3 20	
2 to 3 ft.....	60	5 00	
<b>tristis.</b> 6 to 12 in.....	30	2 40	
<b>viminalis.</b> Tree to 30 or 40 feet. Much used for basketwork abroad. 3 to 4 ft.....	30	2 40	
4 to 5 ft.....	40	3 20

# FINAL SALE OF REMAINING STOCK

AT

## Highlands Nursery Pineola, North Carolina

HARLAN P. KELSEY, Owner, SALEM, MASS.

Labor and shipping conditions at my Highlands Nursery do not improve and a final sale of all remaining stock will be made as below. It is a fine opportunity to secure splendid material at prices that will hardly occur again. Car lots will receive a special discount and no reasonable offer will be refused. The Azaleas, Rhododendrons maximum, catawbiense and carolinianum, Kalmia latifolia and Leucothoe catesbaei are heavy nursery-grown stock and are a particularly good buy especially as no imported stock is coming in.

CLUMP OF  
RHODODENDRON CATAWBIENSE (True Species)  
As Grown at my Nurseries

All stock offered at this final Highlands Nursery sale is nursery-grown unless otherwise specified, and as the LAND IS SOLD must be ordered for shipment before MAY TENTH, 1921.

COLLECTED RHODODENDRONS, KALMIAS, Etc. I will continue to ship direct from the high southern mountains.

*(At Boxford Nursery I am now growing all the choicest Carolina Mountain plants and flowers in far greater quantities than before, the soil and climate having proved to be even more favorable than in the Carolina Mountains, and at Boxford Nursery I now have for sale the choicest Hardy American Rhododendrons, Azaleas, Etc., by ten of thousands.)*

SAVE DISAPPOINTMENT BY ORDERING NOW whether for Fall or Spring shipment. It is the last opportunity to stock up with a splendid lot of the finest American plants at nominal prices.

ALWAYS ADDRESS

**Harlan P. Kelsey, Owner**  
Salem, Massachusetts

**FINAL SALE OF**

**DECIDUOUS AND EVERGREEN**

**Trees, Shrubs, Woody Vines**

**DECIDUOUS AND EVERGREEN**

NOTE.—All plants are transplanted and nursery-grown, unless plainly marked otherwise. This is a catalog of nursery-grown plants growing at my Highlands Nursery, Pineola, North Carolina.

All communications should be addressed: Harlan P. Kelsey, Owner, Salem, Massachusetts.

**"COLLECTED"**

**Rhododendrons and Kalmias**  
**(Mountain Laurel)**

**in Carload Shipments from Highlands**  
**Nursery, Pineola, North Carolina**

The most striking Landscape effects are produced by massing our wonderful native broadleaved Evergreens. I grow them by thousands and supply also a select grade of "collected" clumps, that will give immediate effect, each plant a specimen balled and burlapped. The "cheap" collected stock sent out by "mushroom" collectors often fails—the *best* is always cheapest. *The native species are hardy.* These clumps may be safely shipped from August, through the fall and spring, till June first, but early shipments are always desirable.

**KALMIA LATIFOLIA (Mountain Laurel)**

	Per 100	Per 1000	Approx. No. to car
1 to 2 ft. "collected" clumps, average grade	\$50.00	\$450.00	1000-1400
2 to 3 ft. " " " " "	85.00	700.00	700-1000
3 to 4 ft. " " " " "	125.00	1100.00	500-700

**RHODODENDRON CATAWBIENSE (True Species)**

The finest hardy broad-leaved evergreen for foliage effects.

	Per 100	Per 1000	Approx. No. to car
1 to 2 ft. "collected" clumps, average grade	\$70.00	\$600.00	1000-1400
2 to 3 ft. " " " " "	110.00	850.00	700-1000
3 to 4 ft. " " " " "	180.00	1500.00	500-700
4 to 5 ft. " " " " "	300.00		300-400

**RHODODENDRON MAXIMUM**

	Per 100	Per 1000	Approx. No. to car
1 to 2 ft. "collected" clumps, average grade	\$60.00	\$550.00	1000-1400
2 to 3 ft. " " " " "	90.00	750.00	700-1000
3 to 4 ft. " " " " "	140.00	1250.00	500-700
4 to 5 ft. " " " " "	225.00		300-400

Cars of "collected clumps" will be made up "mixed" if desired, both as to sizes or kinds. Burlaping is recommended, and will be charged for as below.

An extra grade of selected collected clumps can be supplied at 25% to 50% advance to above prices, depending on how perfect the specimens are.

For Prices of Nursery-grown Rhododendrons see Page 21.

**BURLAPING**

Burlaping of "collected" Rhododendrons, Kalmias or other "collected" stock is charged for as per schedule below. Also where small sizes or deciduous stock, nursery-grown, is balled or burlaped by special request a charge is always made to cover cost.

**Schedule of Burlaping Charges**

**At both Highlands Nursery and Boxford Nursery**

	Each
Small sizes.....	\$0 10
2 to 3 ft., clumps and trees.....	15
3 to 4 ft., clumps and trees.....	20
4 to 6 ft., clumps and trees.....	25
6 to 8 ft., clumps and trees.....	30

Larger sizes are charged in proportion. Where large evergreens are shipped on "platforms," a suitable charge will be made to cover cost.
